Personal Author Index

Divisions of 04, 5, 6, 78, 82, 88 acc. to Information Coding Classification (ICC) described and displayed in Int.Classif. 9(1982)2, p.87-93 and in Int.Classif.& Indexing 8 Bibliogr. I.

A further division of this scheme (by one and sometimes two levels) was published in Int.Classif.12(1985)No.3, p.147-151

For reasons of space, it was not possible to include the collected bibliographic items of classes 8 and 9. This literature will be included in the next issue, IC 87-3.

Mills,J., Broughton, V., Lang, V.: Bliss Bibliographic Classification. 2nd ed. Class T: Economics, Management of Economic Enterprises. Orig.en. London, GB: Butterworths 1987. 98+250p., ISBN 0-408-70834-4
The introduction (98p.) comprises the description of the scope of Class T and its place in BC2; its structure, the facet structure, the arrays within facets, the citation order between facets as well as within facets (between arrays), the order in array and alternative arrangements in economics. Problems of notation are treated as well as the alphabetical subject index and special problems in economics. Classification examples are given. The contents of the schedules (191p.) can be accessed by a comprehensive index of 60 pages.

05 Periodicals and Serials

- 87-496 056.121
Coltheart, M., Davies,M., Guttenplan,S., Harris,M., Smith, N., Wilson, D.: Mind and Language. Orig. en. Vol 1, No 1, Oxford, GB: Basil Blackwell 1986
The journal is meant to serve as an interdisciplinary forum for philosophers, psychologists, linguists and workers in artificial intelligence who are all separately engaged in investigating and discussing phenomena of language and mind, but in ignorance of the methods and results of the other disciplines. Issue 1 contains 1) A Forum: Philosophy and Psychology (with contributions by P.M.Churchland, H.H.Clark, D.Den-

nett, D.W.Hamlyn, P.Kitcher, C.McGinn, E.R.Valentine) and 3 articles and a "multiple review" of R.C.Berwick, A.S.Weinberg: The grammatical basis of linguistic performance. Language use and acquisition. Cambridge, MA: MIT Press 1984. 343p. (by C.J.Howe and P.W.Culicover). The journal closes with some announcements of event. The articles:
 - 87-497 Wright, C.: How can the theory of meaning be a philosophical project? - 87-498 Clark, A.: A biological metaphor.
 - 87-499 Sainsbury, R.M.: Evidence for meaning.

87-500 056.252
 Fallside,F., Levinson, St. (Eds.): Computer, Speech & Language. Orig. en. London, GB: Academic Press 1987. Vol. I(1987)No.1, 4/ann.
 This interdisciplinary journal is meant to serve the speech research community. The first issue contains the following articles: 87-501 Prager, R.W., Harrison, T.D., Fallside, F.: Boltzmann machines for speech recognition. - 87-502 Levinson, S.E.: Continuously variable duration hidden Markov models for automatic speech recognition. - 87-503 Larar, J.N.: Lexical access using broad acoustic-phonetic classifications. - 87-504 Roberts, L.A., Wilpon, J.G., Egan, D.E., Bakk, J.: Improving speaker consistency in an automatic speech recognition framework.

Mitt.Vereinig.Österr.Bibliothekare 40(1987)No 1/2, p.51-59
 Digest of the meeting and its speakers and papers. It took place on Jan.30, 1987 at the University Library of Regensburg.

87-513 06.87-03-24/26
Recent developments in clustering and data analysis. Développements récents en classification automatique et analyse des données. Proceedings of the Japanese-French Seminar, 24-26 March 1987. Orig.en,fr. Tokyo: Institute of Statistical Mathematics 1987. 37p.

The volume contains 35 papers organized in the following four sessions. A: Data analysis techniques and related topics with statistical software (Nos.-514-523), B: Automatic classification and related techniques (Nos.-524-531), C: Scaling method and correspondence analysis from the viewpoint of practical approach (Nos.-532-539), D: Applications: Extraction and interpretation of information in multidimensional data (Nos.-540-548).

87-514 Hayashi, Ch.: New developments in multidimensional data analysis. - 87-515 Jambu, M.: Interpretation of some data analysis methods. - 87-516 Scheftman, Y.-M.: A general Euclidean method for measuring and describing associations between several sets of variables. - 87-517 Goto, M., Tasaki, T.: Data-adaptive methods of multivariate analysis. - 87-518 Morineau, A.: Specific design of a software for multivariate descriptive statistical analysis: The case of SPAD N. - 87-519 Wakimoto, K.: A test of goodness of fit based on graphical method. - 87-520 Baba, Y.: Graphical analysis of ranks. - 87-521 Otsu,N., Kurita,T., Asoh,H.: A unified study of multivariate data analysis methods by nonlinear formulations and underlying probabilistic structures. - 87-522 Sai, Sh., Taguri, M.: Optimum classification boundaries based on a concomitant variable in sample survey: some application to the current statistics of commerce. - 87-523 Tango, T.: On the identification problem of age-period-cohort analysis. - 87-524 Oiday, E.: Some recent advances in clustering. - 87-525 Ohashi,Y.: Simultaneous clustering of cases and variables. - 87-526 Roux, M.: Techniques of approximation for building two tree structures. - 87-527 Imaizumi, T.: A hierarchical clustering method for dissimilarity matrices with individual differences. - 87-528 Sakai, S.: Applications of multivariate and cladistic data analysis for the classification of dermopterous insects. - 87-529 Lerman, I.C.: Comparing relational variables according to likelihood of the links classification method. - 87-530 Ohsumi, N.: Role of computer graphics in interpretation of clustering results. - 87-531 Suzuki, Sh.: Classification of fruit and vegetable varieties by chemical analysis of fragrance substances. - 87-532 Excoffier, Y.: Assessing the number of axes that should be considered in correspondence analysis. - 87-533 Yoshizawa, T.: Singular value decomposition of multiarray data and its applications. - 87-534 Yanai, H.: Partial correspondence analysis and its properties. - 87-535 Iwatsubo, Sh.: Correlation analysis of n-way qualitative data and its applications. - 87-536 Tanaka, Y., Tomoyuki, T.: Outliers and influential observations in quantification theory. - 87-537 Haga, T.: Conversational data analysis system: selection of items and pooling of categories. - 87-538 Escoffier, B.: Analysis and comparison of different tables. - 87-539 Ueda, Sh.: Use of tabulated data in data analysis. - 87-540 Lebart,L.: Multivariate descriptive techniques applied to the processing of longitudinal sample survey data. - 87-541 Sugiyama, M.: Multidimensional analysis of opinion survey data. - 87-542 Kishida,K., Sugawara,Y., Ito, T.: Data-analytic approaches to human behavioral relationships in a survey of accidents. - 87-543 Der Megreditchian, G.: On numerical and statistical stability of forecasting models. - 87-544 Komazawa, T.: The methods of pattern classification and its application to prognosis of disease. - 87-545 Nakache, J.P., Guéguen,A.: A non-parametric discriminant analysis based on the construction of a binary decision tree. - 87-546 Miyake, A.: Experimental comparison between the optimal discriminant plane based on samples and general discriminant analysis. - 87-547 Ninomiya, S.P.: A method of discrimination for electrical biosignal. - 87-548 Yajima,K.: Classification of behavioral stages of the mouse.

Forrest, S.: A study of parallelism in the classifier system and its application to classification in KL-ONE semantic networks. PhD Thesis. Orig.en. Ann Arbor, MI: The University of Michigan. Computer Science 1985. 244p.
The author states in the abstract: The "classification" problem was selected as the focus of the investigation because it

is a central problem for many knowledge-based systems. Of the various knowledge representation paradigms in use today, the KL-ONE family has addressed the problem of classification most directly. The author implemented a compiler that translates KL-ONE definitions into a Classifier System representation. In addition he developed a group of parallel algorithms that uses the Classifier System representation to decide where an incoming concept should be classified in an existing KL-ONE network.

Orig.en. Inform.Process.& Management Vol 23, No 3,1987. p.246

87-707 448.19
Grimaldi, T.: Cutter e i fondamenti teorici delle "Library of Congress Subject Headings (LCSH). (Cutter and the basics of the LCSH) Orig.it. Bibliotecario, No 11-12, 1987. p.151-162, 29 refs.
A review of the discussions about theory and praxis of subject cataloguing as done in the Library of Congress.

87-708 448.27
Cochrane, P.A.: Improving LCSH for use in online catalogs: Exercises for self-help with a selection of background readings. Orig.en. Littleton, CO: Libraries Unlimited 1986. XIV, 348p., ISBN 0-87287-484-2 (pbk)
The volume comprises two sections: (1) consisting of six chapters (95 p.) by P.A.Cochrane and (2) with contributions of 23 other authors (+2 by Mrs.Cochrane) on related topics, being either full or partial reprints of papers containing useful

suggestions for improving LCSH. The chapters of Section 1: LCSH: What it is and is not and what it may become within the online catalog. Form of LCSH headings in library catalogs: Suggestions for improvement and for more scope notes. LCSH cross-reference structure: Suggested improvements. LCSH subdivisions: suggested improvements. LCSH, LCC, and DDC: Suggested relationships. LCSH and subject access online: Improvements through enhancements and user assistance. - Each chapter includes exercises, notes and selected readings. The subject index (p.333-348) was prepared by Robert H.Burger. The contributions (reprints) of Section 2:

 Hustache,E. et al.: Salam LAMECH. Liste d'autorité de matières encyclopédique, collective et hiérarchisée. (Salam LAMECH. Collective and hierarchical authority list of encyclopedic subjects) Orig.fr. Bull.Bibl.France Vol 31, No 3, 1986. p.254-255
 Introduction to LAMECH (Liste d'autorité de matières encyclopédiques, collection et hiérarchisée = Encyclopaedic collective and hierarchical subject authority list). It is primarily, with its 70 000 preferred terms, a reference tool for indexing. It originates in the work done in France by the BPI and the Bibliothèque Nationale after the French translation of LCSH by the University of Laval in Quebec. The main access to the list should be through an online databank hosted by SUNIST. Its management is done by the National Centre for Coordination and Subject Indexing. The software ALEXIS is used for access and updating. (Author, abbrev.)

72 Semantics

87-775

Ineichen, H.: Einstellungssätze. Sprachanalytische Untersuchungen zur Erkenntnis, Wahrheit und Bedeutung. (Propositional attitudes. Analytic investigations into recognition, truth and meaning) Orig.de. München, DE: W.Fink Verl. 1987. 367p. Sentences with the verbs "to know", "to believe", "to mean", "to feel", "to hate", and "to want", etc. characterized the objects of the investigation which has been a habilitation work of 1983/84. Literature until 1982 was considered. The book is in three parts: 1) Epistemological and psychological problems of attitude verbs, 2) On the semantic interpretation of language expressions, 3) The logical form of attitude propositions as their semantic interpretation. These 3 parts comprise 19 chapters. Bibliography p.347-360. Indexes of persons and subjects.

 Bates, M.J.: Subject access in online catalogs: A design model. Orig.en. J.ASIS Vol 37, No 6, 1986. p.357-376
 A model based on strikingly different philosophical assumptions from those currently popular is proposed for the design of online subject catalog access. Three design principles are presented and discussed: 'uncertainty' (subject indexing is indeterminate and probabilistic beyond a certain point), 'variety' (by Ashby's law of requisite variety, variety of searcher query must equal variety of document indexing), and 'complexity' (the search process, particularly during the entry and orientation phases, is subtler and more complex, on several grounds, than current models assume). An end-user thesaurus and a front-end system mind are presented as examples of online catalog system components to improve search success during entry and orientation. The proposed model is "wrapped around" existing Library of Congress Subject Heading-indexing. (Author, abr.)

Pollitt, St.: CANSEARCH: An expert systems approach to document retrieval. Orig.en. Inform.Process.& Management Vol 23, No 2, 1987. p.119-138, 22 refs.

Provision of a computerized intermediary system to facility online document retrieval from large-scale data bases directly by users of the retrieved information. The system is called CONSEARCH and is designed to enable doctors to specify queries to retrieve cancer-therapy-related documents stored in the MEDLINE data base. The principle of search space abstraction was used, with menu selection from a touch terminal and encapsulated intermediary expertise using rule-based techniques programmed in PROLOG. (Author, abr.)

Vickery, A.; Brooks, H.M.: PLEXUS - the expert system for referral. Inform.Process.& Management Vol 23, No 2, 1987. p.99-117, 8 refs.

PLEXUS is an expert system designed as a referral tool to be used in public libraries. It was developed by the Central Information Service (CIS) at the University of London. It is meant to carry out the same kind of tasks as the human reference librarian does and should do it in a way which, if done by a human would be described as intelligent. The prototype system is restricted to gardening. The paper describes the knowledge base of PLEXUS, its representation, the control mechanism, and the working system as a whole. (Author, abr.)
